Summary

Dynamic and self-driven software developer with a proven ability to adapt to diverse tools and work environments. Passionate about creating robust and scalable applications, with expertise in the MERN stack. Actively seeking opportunities in software systems development, leveraging emerging technologies to deliver innovative solutions across various domains.

Projects

Library Book App

MERN Stack

March 2025 - Present

- Developed a full-stack library management application using MongoDB, Express.js, React, and Node.js, Tailwind CSS. Features include user authentication (login/signup), book addition, deletion, and updates and Integrated Zustand for state management. Implemented a responsive UI and RESTful APIs for efficient book management.

Student Management CRUD App

MERN Stack

February 2025 - March 2025

- Developed a Student Management CRUD App using MongoDB, Express.js, React, and Node.js. Implemented CRUD operations for managing student records. Integrated a search function for easy record retrieval and designed a responsive UI for seamless user experience.

Product Store Site

MERN Stack

December 2024 - January 2025

- Implemented CRUD operations for managing products, including adding, updating, deleting, and viewing products. Integrated Zustand for state management, ensuring a smooth and efficient user experience with a responsive UI.

Education

BSc (Hons) in Software Engineering

NSBM Green University

(Current GPA: 3.50/4.00)

Relevant Skills

- Html, CSS, JavaScripts
- ReactJs
- Node Js , Express Js
- Tailwind CSS
- Database MongoDB and MySQL
